The Honorable Milton I. Shadur
United States District Judge
United States District Court
Northern District of Illinois
Eastern Division
219 South Dearborn Street
Chicago, Illinois 60604

Re: Quarterly Report of Independent Special Counsel, *Perez v. Estate of Frank E. Fitzsimmons, et al.*, No. 78 C 342 (N.D. Ill., E.D.); *Perez v. Robbins, et al.*, No. 78 C 4075 (N.D. Ill., E.D.); and *Perez v. Dorman, et al.*, No. 82 C 7951 (N.D. Ill., E.D.)

Dear Judge Shadur:

This is to report on my activities during the second quarter of 2015 as Independent Special Counsel appointed pursuant to the *Fitzsimmons* (Pension Fund) and *Robbins* and *Dorfman* (Health and Welfare Fund) consent decrees.

Audit

At the May 2015 Meetings of the Pension and the Health and Welfare Funds, the Internal Audit Department presented its report concerning the 2015 audit of payroll processing. The overall conclusion of this audit was that adequate administrative and internal controls surrounding payroll processing were operating during the period tested, and that these controls provided a basis for reliance that payroll processing is functioning in accordance with the Funds policies and procedures.

Pension Fund

PPA-Related Issues

As explained in previous reports, the multiemployer plan funding rules of the Pension Protection Act of 2006 ("PPA") became effective on January 1, 2008. On March 24, 2008, the Fund's actuary certified the Fund to be in "critical status" under the PPA for the 2008 plan year; the actuary has made the same certification with respect to

subsequent plan years, except that in March 2015, the actuary certified the Fund to be in the new category of "critical and declining" created by the Multiemployer Pension Reform Act of 2014 (discussed below). As a result of the initial critical status certification, the Trustees adopted a "rehabilitation plan" as the PPA requires for critical status plans. In broad outline, the Rehabilitation Plan approved by the Trustees contains a "Primary Schedule," which requires each contributing employer to agree to five years of 8% annual contribution increases (7% if the increases began in 2006) in order to maintain current benefit levels for the affected bargaining unit. The PPA also requires that a rehabilitation plan contain a "Default Schedule" which must provide for the reduction in what the PPA terms "adjustable benefits"; the Fund's Rehabilitation Plan mandates 4% annual contribution rate increases. ("Adjustable benefits" under the PPA generally include all benefits other than a contribution-based retirement benefit payable at age 65.) The PPA also provides that if the bargaining parties have not chosen any of the schedules established by a rehabilitation plan (*i.e.*, the Primary or Default Schedule) within 180 days following the expiration of the parties' last labor agreement, the Default Schedule will be imposed as a matter of law. In addition, the Rehabilitation Plan provides that that the members of bargaining units who agree to a withdrawal from the Pension Fund (or otherwise acquiesce or participate in a withdrawal -- an event termed a "Rehabilitation Plan Withdrawal" -- also incur a loss of their adjustable benefits.

As explained in my previous reports, in November 2014 the Trustees concluded during the process of updating the Rehabilitation Plan (which the statute requires on an annual basis), that any further or additional benefit reductions or the imposition of additional requirements for increased contributions (*i.e.*, beyond those already implemented and set forth in Rehabilitation Plan) would entail too great a risk of irreparable harm to a large number of contributing employers, or would otherwise risk prompting an undue and harmful number of withdrawals from the Fund.

However, in the 2014 Rehabilitation Plan update process, the Trustees approved continued implementation of (i) the Distressed Employer Schedule (which the Trustees believe accommodated the special circumstances presented by YRC, Inc. in a manner that was actuarially favorable to the Fund; *see* pp. 11 - 12 below), (ii) the hybrid withdrawal liability method (pp. 10 - 11 below), and (iii) the benefit modifications, contribution rate increases and other features of the Rehabilitation Plan that have been previously adopted (*e.g.*, the Trustees raised the minimum retirement age to 57, effective as of June 1, 2011).

Although it appears the Pension Fund has reported some progress in securing increased employer contributions and in adjusting

benefits as required of "critical status" plans under the PPA, the Fund suffered serious investment losses in the general stock market and economic downturn that commenced in 2008 (and before that, in the 2002 - 2003 market decline). In more recent years, the Fund has enjoyed significant investment gains. For example, the Fund enjoyed a composite rate of return of 19.04% for calendar year 2013, and a rate of return of 6.86% for calendar year 2014. However, the asset level as of June 30, 2015 of approximately $17.3 billion is still several billion dollars below the value of assets held by the Fund shortly before the commencement of the 2008 stock market collapse -- and 2015 to date has proven to be a difficult year for investors. But the Fund's Staff reports that the downward pressure on the Fund's assets is largely due to the Fund's current annual operating deficit of more than $2 billion per year - meaning that in recent years the Fund has paid out more than $2 billion each year *more* in benefits than it has collected in contributions from employers.

In addition, as indicated in my prior reports, the Pension Fund's Staff has reported that, for plan year 2008, the Pension Fund was unable to satisfy the funding ratio targets that are a condition of the amortization extension granted to the Fund by the IRS in 2005. Staff reports that these funding ratio targets were also missed for plan years 2009 through 2012 and for plan year 2014, but the funding target for 2013 was satisfied. Staff has also reported that as a result of the failure to meet the 2008 funding ratio targets, in early 2009 the Pension Fund filed an application with the IRS requesting a waiver of the funding target conditions established under the amortization extension, due to the unexpected economic decline that occurred in 2008; that application is still pending.

Funding Issues Confronting Multiemployer Plans

As previously reported, in the 111th Congress, Thomas C. Nyhan, Executive Director and General Counsel, testified before the Senate Committee on Health, Education and Labor in favor of legislation (H.R.3936; S.3157; the "Create Jobs and Save Benefits Act of 2010") that would generate additional revenues to alleviate the funding shortfalls. That legislation received little support in the House, Senate or from the Administration, so the bill failed and it has not been reintroduced. More recently on October 29, 2013 Mr. Nyhan testified before the U.S. House of Representatives Committee on Education and the Workforce (Subcommittee on Health, Employment Labor and Pensions). Mr. Nyhan's testimony generally supported a legislative solution that would modify the ERISA anti-cutback rule to allow troubled multiemployer plans more flexibility in addressing funding issues. Mr. Nyhan indicated that this was not the preferred solution, but it appeared to be the only practical path open in light of the fact that the Pension Benefit Guarantee Corporation ("POctober 19, 2015October 19, 2015the government agency that underwrites

private pensions) has dire funding problems of its own, and given the general lack of political appetite for programs that might increase the government's fiscal commitments.

The PBGC's 2014 Annual Report, released in September 2015, indicates that (due largely to recent increases in the premiums multiemployer plans are required to pay to the PBGC) there has been a slight improvement in the financial condition of the agency's multiemployer plan guaranty fund -- which is now projected to become insolvent in 2025 as compared to the 2022 insolvency that was projected in the prior (fiscal year 2013) PBGC annual report. However, the PBGC's currently projected insolvency in 2025 is still prior to the Pension Fund's projected insolvency in 2026. This means that the PBGC will have no financial resources to pay benefits to the Pension Fund participants if, as projected, the Fund becomes insolvent in 2026.

Multiemployer Pension Reform Act of 2014

As indicated in my prior reports, it appears that in response to these funding issues impacting a number of multiemployer plans throughout the United States, in December 2014 the Multiemployer Pension Reform Act of 2014 ("MPRA" or the "Act") was enacted.

The provisions of MPRA (codified as amendments to ERISA and the Tax Code) of greatest significance for the Central States Pension Fund relate to what the new statute terms a "suspension of benefits," defined as a "temporary or permanent reduction of any current or future obligation of the plan to any participant or beneficiary…, whether or not in pay status at the time of the suspension of benefits." ERISA § 305 (e)(9)(B)(i). The sponsor of a plan, such as the Pension Fund, that is in "critical and declining status" (*e.g.*, projected to become insolvent in 10-15 years) "may [as] the sponsor deems appropriate" enact, and seek Department of the Treasury approval for, plan amendments implementing suspensions of benefits. ERISA § 305 (e)(9)(A).

As has also been indicated in my prior reports, since the enactment of MPRA at the end of 2014, the Trustees have held a number of meetings with Ms. Susan Mauren (the retirement representative appointed pursuant to the requirements of MPRA) and with Staff, actuarial consultants and legal advisors in order to consider (1) whether to propose a suspension plan and (2) the form that any such suspension plan should take. It should be noted MPRA requires that any suspension plan must not only be projected to avoid the insolvency that the plan is facing but must also only impose benefit suspensions that are required to avoid the insolvency, and are not materially greater than are necessary to accomplish that goal. ERISA § 305(e)(D)(iv). In addition, MPRA sets forth a number of other

conditions and limitations relating to benefit suspensions, such as rules prohibiting benefit suspensions for participants at age 80 or older, limiting suspensions for those between the ages of 74-79, protecting disability-based pensions and prohibiting any reductions that result in benefits below 110% of the amount that would be guaranteed by the PBGC. These conditions and limitations were summarized in my prior report concerning the first quarter of 2015.

After considering a number of options and gathering actuarial and legal advice in the course of the meetings described above, the Trustees authorized the filing of an application with the Department of the Treasury for approval of a MPRA suspension plan on September 25, 2015. The application, with its attachments, comprises more than 8,000 pages of documents. The proposed suspension plan is summarized in the attached two page document entitled "Central States Pension Fund Proposed Recue Plan Overview." This overview was sent on October 1, 2015 to each of the more than 400,000 participants of the Pension Fund, along with a statutory notice of the Pension Fund's filing of the September 25, 2015 application for approval of the suspension plan, and individualized statements concerning the impact of the proposed suspension plan on each participant.

As indicated in the attached overview, except with respect to participants impacted by the conditions and limitations concerning benefit suspensions mandated by MPRA, the proposed suspension plan essentially recalculates the benefit entitlements of all participants on the basis of the amount of contributions paid to the Fund on the participants' behalf. This means that, subject to the statutory limitations and conditions, all retirees and participants actively employed by contributing employers, and all "terminated" participants (*i.e.*, those who are terminated from active service with a contributing employer, but have not yet retired) who have more than twenty years of contributory service credit, will receive a monthly pension benefit equal to 1% of the total contributions made to the Fund on their behalf as of the implementation date of the suspension plan. The "1%-of-contributions" rule accords with the basic benefit accrual rule that has been in place since 2004. Terminated participants with fewer than twenty years of contributory service credit will receive 0.5% of contributions. *After* implementation of the proposed suspension plan, the future rate of benefit accrual will be reduced from 1% to 0.75%.

In terms of the overall impact of the suspension plan, the Pension Fund's Staff advises that although there are many variables in the plan that cause the impact of the suspensions to vary greatly among the individual participants (including the requirements and conditions mandated by MPRA), the *average* benefit reduction under the plan will be approximately 22%. Further, Staff advises that 33% of the participants will not incur any benefit reductions at all under

the proposed suspension plan -- and that this "no-cut" percentage jumps to 45% after including the participants who earned pension credit while employed with United Parcel Service, Inc. ("UPS") and whose benefits with the Pension Fund have been separately guaranteed by UPS. Finally, Staff advises that 41% of retirees will receive complete or partial protection under the age-based limitations on suspensions mandated by MPRA, and that 74% of the surviving beneficiaries of deceased participants will experience no benefit reductions under the suspension plan.

The plan also includes liberalized post-retirement reemployment rules applicable to participants who experience benefit reductions under the suspension plan. These new reemployment rules will make it easier for participants to work in post-retirement jobs while drawing pensions, thus enabling the participants to earn income that will offset the benefit reductions under the suspension plan.

In guidance issued in June of this year Treasury announced that multiemployer plans seeking approval of a MPRA suspension plan should select an implementation date that is at least 9 months after the date on which the plans filed their application seeking approval of the suspension plan. Therefore, the Pension Fund's September 25, 2025 application for approval of the proposed suspension plan requests a July 1, 2016 implementation date. In any event, MPRA provides that Treasury has 225 days to consider the Fund's application for approval of the suspension plan. If Treasury does not make a ruling on the application in that time frame, the application is deemed approved. MPRA also states that any suspension plan approved by Treasury must be put out for a vote by all participants within 30 days of approval by Treasury. However, Treasury also has authority to approve or modify a proposed suspension plan that has been rejected in a vote by the participants, if Treasury determines that the suspension plan involves a "systemically important" multiemployer plan *i.e.,* a plan important to the entire system of federally regulated multiemployer pension plans.

In the coming weeks Treasury will post the Pension Fund's entire application for approval of the suspension plan on the agency's website. It is anticipated that Treasury will also be collecting comments concerning the Pension Fund's application and proposed suspension plan, and that Treasury will soon begin its own internal deliberative process concerning the Fund's application.

In the meantime, in addition to the mailing the required statutory notices and impact statements to all participants, the Pension Fund will be posting information concerning the proposed suspension plan on the Fund's website and the Fund will also be hosting a teleforum at which participants can pose questions to the Fund by phone or e-mail concerning the suspension plan. The Fund has also held meetings to explain the suspension plan to participating

Local Unions and employers. The MPRA retiree representative, Ms. Susan Mauren, has also posted information concerning the suspension plan on her website, along with her own comments concerning the plan and a report concerning the plan by an independent actuary whom she has retained.

Financial Information - Investment Returns

The Pension Fund's investment return for the second quarter of 2015 was (0.23)%.

A comparison of the Pension Fund's performance to the TUCS[1] universe results published for the second quarter of 2015(showing percent returns on investment) is summarized in the following tables:

Pension Fund's Composite Return

	2nd Quarter Ended June 30, 2015	One Year Period Ended June 30, 2015	Three Year Period Ended June 30, 2015
TUCS 1st Quartile	0.72	4.31	11.46
TUCS Median	0.32	3.40	10.61
TUCS 3rd Quartile	(0.43)	2.30	9.33
Fund's Composite Return	(0.23)	3.00	11.46

Pension Fund's Total Equity Return

	2nd Quarter Ended June 30, 2015	One Year Period Ended June 30, 2015	Three Year Period Ended June 30, 2015
TUCS 1st Quartile	1.32	6.58	16.45

[1] "TUCS" is the Trust Universe Comparison Service. Its Custom Large Funds Universe is composed of plans with assets exceeding $3 billion.

TUCS Median	0.73	4.00	15.92
TUCS 3rd Quartile	0.45	2.41	14.45
Fund's Total Equity Return	0.54	4.74	16.15

Pension Fund's Fixed Income Return

	2nd Quarter Ended June 30, 2015	One Year Period Ended June 30, 2015	Three Year Period Ended June 30, 2015
TUCS 1st Quartile	(0.57)	2.02	3.54
TUCS Median	(1.18)	1.64	2.85
TUCS 3rd Quartile	(3.05)	0.69	2.43
Fund's Fixed Income Return	(1.18)	0.02	2.09

The Fund's Named Fiduciary, Northern Trust Investments, Inc. ("Northern Trust")[2], which has been allocated 50% of the Fund's investment assets) submits monthly investment reports to the Trustees, summarized below (showing percent returns on investment):

Northern Trust

	Year-to-Date as of June 30, 2015	April 2015	May 2015	June 2015
Northern Trust's Composite Return	2.75	1.38	0.31	(1.76)

[2] Formerly known as Northern Trust Company of Connecticut, which was in turn formally known as Northern Trust Global Advisors, Inc.

Benchmark Composite Return	2.19	1.51	0.06	(2.00)
Northern Trust's Total Fixed Income Return	1.50	1.12	(0.05)	(1.54)
Benchmark Fixed Income Return	1.22	1.07	(0.13)	(1.39)

Northern Trust's second quarter 2015 composite return included a 0.48% return on U.S. equities (1.56% on large cap, (0.85)% on mid cap and 0.07% on small cap U.S. equities), 1.10% on international equities, (6.78)% on real estate and (1.35)% on global listed infrastructure).

The Fund's financial group reported the following asset allocation of the Pension Fund as a whole as of June 30, 2015 as follows: 61% equity, 34% fixed income, 4% other and 1% cash.

The financial group also reported that for the second quarter of 2015 the returns on the Fund's passive indexed accounts were as follows (showing percent returns on investment):

Account	Rate of Return for 2nd Quarter 2015	Rate of Return year-to-date as of June 30, 2015
Passive Indexed Equity (S&P 500) (25% of investment assets)	0.30	1.16
Passive Indexed Fixed Income (20% of investment assets)	(1.66)	(0.13)
Passive EAFE Indexed (5% of investment assets)	0.81	5.83

Financial Information - Net Assets
(Dollars shown in thousands)

The financial reports prepared by Pension Fund Staff for the six months ended June 30, 2015 (enclosed) show net assets as of that date of $17,330,922, compared to $17,863,106 at December 31, 2014, a decrease of $532,184 compared to a decrease in net assets of $5,371 for the same period in 2014. The $526,813 difference is due to $672,856 less net investment income offset by $146,043 less net operating loss.

The enclosed Fund's Staff report further notes that for the six months ended June 30, 2015, the Fund's net asset decrease from operations (before investment income) was $876,543 compared to a

decrease of $1,022,586 for the same period in 2014, or a $146,043 favorable change. This change in net assets from operations (before investment income) was attributable to:

a) $149,387 more contributions, primarily recognition of withdrawal liability previously classified as potentially refundable,

b) $4,036 less benefits and

c) ($7,380) more general and administrative expenses.

During the six months ended June 2015 and 2014, the Fund withdrew $1,012,615 and $1,045,785, respectively, from investment assets to fund the cash operating deficit.

Financial Information - Participant Population

The enclosed June 30, 2015 report prepared by Fund Staff further notes that the five-month average number of Full-Time Equivalent ("FTE") memberships decreased 1.17% from May 2014 to May 2015 (going from 60,235 to 59,529). During that period, the average number of retirees decreased 0.98% (from 209,345 to 207,284).

Named Fiduciary

Officers of the Named Fiduciary, Northern Trust, met with the Board of Trustees to discuss portfolio matters including asset allocation.

Hybrid Withdrawal Liability Method

As indicated in my prior reports, in July 2011 the Trustees adopted -- subject to approval by the Pension Benefit Guaranty Corporation ("PBGC") -- an alternative withdrawal liability method.[3] Under this method, new employers joining the Pension Fund will have their withdrawal liability measured based upon the "direct attribution" method; employers who already participate in the Fund can also be treated as new employers for withdrawal liability purposes on a prospective basis (and become eligible for the "direct attribution" method) by satisfying their existing withdrawal liability under the method historically employed by the Pension Fund (*i.e.*, the "modified presumptive method"), and then agreeing to continue to contribute to the Fund. This recently formula is referred to as a "hybrid" withdrawal liability method.

---

[3] The Pension Fund's Staff advises that on October 14, 2011, the PBGC approved the Pension Fund's use of the hybrid method.

Staff reports that it believes the hybrid method offers a means for employers who are concerned about the potential for future growth in their exposure to withdrawal liability to cap their liability at its present level while continuing to participate in the Fund with little or no risk of withdrawal liability in the future.

Further, as explained in my prior reports, in November 2012, the Trustees restructured the Primary Schedule of the Rehabilitation Plan so that employers who satisfy their withdrawal liability qualify as New Employers under the hybrid method and continue to contribute to the Pension Fund will not be subject to the rate increase rate requirements to which other Primary Schedule Employers are subject. The Trustees have also approved an amendment intended to help ensure that New Employers who satisfy their existing withdrawal liability and continue to contribute to the Fund under the hybrid method will not face increased risks in the event of a mass withdrawal, as compared to employers who have simply withdrawn from the Fund and completely discontinued pension contributions.

Staff reports that to date approximately 80 old employers have satisfied their existing liability and qualified as new employers under the hybrid plan, or have made commitments in principle to do so. This has resulted in the payment of (or commitments to pay, subject to the execution of formal settlement documents) approximately $ 130 million in withdrawal liability to the Pension Fund while the employers in question also continue to contribute to the Fund pursuant to their collective bargaining agreements at guaranteed participation levels.

Bankruptcies and Litigation

The Fund's Staff also reports that Allied Systems Holdings, Inc. and its affiliates ("Allied") -- an automobile transporter with several hundred participants in the Funds -- filed for Chapter 11 bankruptcy protection in mid-2012. However, Allied continued to operate in bankruptcy and to pay contributions to the Funds on behalf of its drivers. Staff reports that in December 2013 Jack Cooper, Inc., another unionized automobile transporter, purchased the assets of Allied in the bankruptcy and will continue to contribute to the Funds with respect to the purchased assets and operations, but without an assumption or Jack Coopers' withdrawal liability. Allied's withdrawal liability (in the amount of $976 million) was triggered by the sale and Staff advises that the Allied bankrupt estate is not likely to have assets sufficient to satisfy this assessment. However, as noted, Jack Cooper should be able to continue the income stream to the Funds represented by the contributions historically paid by Allied.

YRC

As also previously reported, in May 2009 the Funds entered a Contribution Deferral Agreement ("CDA" or "Deferral Agreement") with YRC, Inc. and its affiliates ("YRC") -- one of the largest contributing employers to the Fund. Under the Deferral Agreement, the Pension Fund ultimately agreed to defer approximately $109 million in pension contributions. The Fund's financial consultant indicated that absent deferral of these contribution obligations, YRC would be in default of loan covenants with its banks; Staff reported that such a default would risk triggering an insolvency and liquidation of YRC, which would destroy any chance of rehabilitating the employer as a healthy contributor to the Funds.

Some 25 other multiemployer pension plans in which YRC participates joined in the Deferral Agreement, but the Pension Fund is owed approximately 64% of the contributions deferred under the Agreement.

Following a temporary termination of YRC's participation in the Pension Fund (due to its chronic delinquencies), on September 24, 2010, the Teamsters National Freight Negotiating Committee and YRC executed an Agreement for the restructuring of the YRC Worldwide, Inc. Operating Companies ("Restructuring Agreement"), which further revised YRC's pension contribution obligations. Under this Agreement YRC was scheduled to resume contributions to the Pension Fund in June 2011 at a rate constituting a 75% reduction from its pre-termination (pre-July 2009) rate.

In March 2011 the Trustees then approved an arrangement under which the CDA repayment obligations are to be deferred until March 31, 2015 (when a lump sum payment of the entire CDA balance was scheduled to be made), with the exception of monthly interest payments to commence in June 2011.

At the March 9, 2011 Board Meeting, the Fund's Trustees also determined, in light of the company's continuing financial distress, that it was appropriate to accept contributions at the new contribution rate proposed under the YRC/TNFNC September 24, 2010 Restructuring Agreement (25% of the rate required prior to the July 2009 termination).

At the same time, the Trustees decided that the YRC employee unit should receive reduced benefits equivalent in most respects to the Default Schedule under the Fund's Rehabilitation Plan. (This is termed the "Distressed Employer" schedule of benefits.)

In January 2014, after consultation with financial, actuarial and legal advisors, the Trustees voted to approve a revised CDA extending the balloon payment under the CDA from 2015 to 2019. The

other Teamster Pension Funds who participated in the CDA also agreed to these terms and an amended CDA was executed on January 31, 2014.

Staff also reports that since July 2011, YRC has remained current in its pension contribution payments ($3-$4 million per month), and in the monthly interest payments (beginning in August 2011) of approximately $500,000. In addition, on November 12, 2013 the interest rate under the CDA escalated from 7.5% per year to 7.75%.

In addition, Staff has reported that to date the Pension Fund has received approximately $ 40 million as its share of the net proceeds from sales of collateralized assets as a pre-payment under the CDA. Staff reports that after accounting for all principal and interest payments made to date, the unpaid balance owed to the Pension Fund under the CDA by YRC is approximately $ 80 million. Staff also notes that in May 2012 the Fund received a payment of approximately $110,000 under the CDA which is expressly denominated as a fee calculated under that Agreement as a match of a portion of a refinancing charge paid by YRC to its commercial lenders (and not applicable to reduce YRC's principal or interest balance); on November 12, 2013 the Fund received approximately $419,000 as another such refinancing fee match.

Hostess Brands, Inc.

In August 2011, Hostess Brands, Inc. ("Hostess") -- an employer that had regularly contributed to the Pension Fund on behalf of approximately 2,800 participants -- failed to make the monthly pension contribution payment of approximately $1.9 million that was due on August 15, 2011.

Hostess's pension contribution delinquency persisted and at the November 2011 Board Meeting the Trustees voted to terminate the participation of Hostess in the Pension Fund and to generally reduce the benefits of the Hostess participants to the Default Schedule levels specified under the Rehabilitation Plan (*see* pp. 5 - 6 above).

On January 11, 2012, Hostess filed a petition under Chapter 11 of the Bankruptcy Code in the Southern District of New York. The Pension Fund has delinquent contribution claims in the amount of approximately $8 million against the bankrupt estate, as well as withdrawal liability claim in the amount of approximately $583 million.

As previously reported, Staff indicates the efforts to reorganize Hostess were unsuccessful and it appears that proceeds from the Hostess liquidation may not be sufficient to satisfy the company's secured debt, and this, of course, would leave the Pension Fund and other general unsecured and non-administrative priority

creditors with unsatisfied claims (the Pension Fund has no administrative claims in the Hostess Bankruptcy).

Health and Welfare Fund
Financial Information

(Dollars shown in thousands)

The Health and Welfare Fund's financial summary for the six months ended June 30, 2015 are compared below with financial information for the same period of 2014:

	Six Months Ended June 30,	
	2015	2014
Contributions	$ 1,422,510	795,346
Realized portion of UPS lump sum	49,056	1,360,537
Benefits	1,163,940	643,274
TeamCare administrative expenses	36,193	21,641
General and administrative expenses	31,627	25,882
Net operating income	239,806	1,465,086
Investment income (loss)	16,065	58,771
Increase in net assets	255,871	1,523,857
Net assets, end of period	4,075,612	3,540,929
Five-month average Participants (FTEs)	179,379	88,616

For the six months ended June 30, 2015, the Health and Welfare Fund's net asset increase from operations (before investment income) was $239,806 compared to an increase of $1,465,086 for the same period in 2014, or a $1,225,280 unfavorable change:

(a) ($684,317) less contributions, primarily due to recognized portion of 2014 UPS lump sum,

(b) ($520,666) more benefits, primarily due to UPS,

(c) ($14,552) more TeamCare administrative fees and

(d) ($5,745) more general and administrative expenses.

During the six months ended June 2015 and 2014, the Fund transferred $182,174 and $1,755,094, respectively, to investments (BNY Mellon) as the operations generated positive cash flows for those periods.

The enclosed report entitled "Central States Funds Financial and Analytical Information" prepared by the Fund's financial group as of June 30, 2015 shows the investment asset allocation as 85% fixed income and 15% equity; in previous years, 75% of the Health and Welfare Fund's assets were allocated to fixed income. Staff reports that the somewhat higher allocation to fixed income as of June 30, 2015 is temporary and was caused by the increased revenue associated with the increased participation of UPS, Inc. (and its affiliates) in the Health and Welfare Fund, including a lump sum payment made by UPS, Inc. on June 1, 2014. As noted in my prior reports, under the Third Amended Consent Decree approved by the Court, on August 11, 2014, Northern Trust Investments, Inc. ("NTI") was appointed as a named fiduciary of the Fund with responsibility for rebalancing and reallocating the Fund's assets in light of this increased revenue. On January 15, 2015, pursuant to the Third Amended Consent Decree, a reallocation of assets was implemented so that as of that date, 50% of the Health and Welfare Fund's assets were controlled by NTI as named fiduciary, and 50% of the assets were in passive or indexed accounts controlled by asset managers appointed by the Trustees. The Fund's Staff reports that NTI plans to gradually increase the allocation to equity of the assets under its control so that by year-end 2015 20% of the Fund's total assets will be invested in equity securities.

The enclosed report also notes that the five-month average number of Full-Time Equivalent (FTE) memberships increased by 102.42% from May 2014 to May 2015 (going from 88,616 to 179,379). During that period, the average number of retirees covered by the Health and Welfare Fund increased by 2.86% (from 7,961 to 8,189).

Article V (H)

As required by Article V (H) of the Health and Welfare Fund Consent Decree, the Health and Welfare Fund has paid during the second quarter of 2015 the following for professional services and expenses for the Independent Special Counsel:

April	$ 4,169.14
May	$ 0.00
June	$ 2,397.53

I will be glad to provide additional details regarding any aspect of my activities as Independent Special Counsel. Should you have any questions or comments, please do not hesitate to contact me.

Sincerely,

David H. Coar

Enclosure

CENTRAL STATES PENSION FUND PROPOSED RESCUE PLAN OVERVIEW

(See Enclosed Notice Dated September 25, 2015 for Full Explanation)

OVERALL: Central States' proposed rescue plan has been designed so that post-MPRA benefits are tied to the amount of pension contributions made on each participant's behalf by employers.

TIMING: Benefit reductions under Central States' proposed pension rescue plan, submitted to the U.S. Department of the Treasury ("Treasury") on September 25, 2015, will, under current rules, become effective on July 1, 2016—if approved by both Treasury and a subsequent vote of our plan participants.

If the proposed rescue plan is rejected by a participant vote, but Central States is deemed by Treasury to be "systemically important" (meaning its failure could play a role in bringing down the entire multiemployer pension system), then Federal law requires Treasury to permit implementation of the plan (or a modified version of the plan).

RE-EMPLOYMENT: Under our proposed pension rescue plan, Central States will remove <u>all</u> re-employment restrictions for participants who retired on or before October 1, 2015.

Participants who retire from active status at age 62 or older but before age 65 after October 1, 2015 may seek any re-employment they choose outside of Core Teamster Industries (as defined in the Plan), but must avoid re-employment with any Contributing Employer for whom they worked in the one year before retirement.

Upon reaching age 65, regardless of the age at which they retire, retirees will not be subject to any re-employment restrictions, except that participants who last worked (pre-retirement) for a Contributing Employer in a non-bargaining unit capacity cannot return to work for that same employer for a period of one year after retirement.

Please note that these revised re-employment rules will not be applicable to participants whose benefits are not reduced under this pension rescue plan (due to age, disability, etc.) Additionally, these changes to Central States' re-employment rules will only become effective if our proposed pension rescue plan is approved and implemented.

FUTURE ACCRUALS FOR ACTIVE PARTICIPANTS: Moving forward, after rescue plan implementation on July 1, 2016, pension benefits will continue to be earned—at a rate of 0.75 percent of employer contributions—on top of the projected monthly rescue plan benefit amount (as shown on page 6 of the enclosed Notice).

For example, participants covered by the National Master Freight Agreement will earn an additional monthly pension benefit of $133.38 ($342 weekly employer contribution rate x 52 weeks x 0.75%) for each year they continue to work. So, after having 10 additional years of contributions, the monthly pension benefit will increase by $1,333.80 (10 x $133.80). Another example: a participant with a current contribution rate of $256.42 will earn an additional monthly pension benefit of $100 ($256.42 x 52 weeks x 0.75%) for each year of continued work. Should contribution rates increase, the amount of additional monthly accruals will also increase.

EARLY RETIREMENT: Starting in 2021 (five years from the implementation date of its proposed pension rescue plan), Central States will begin to gradually increase the minimum age at which participants can retire (early retirement) without reductions for pre-age 65 retirements. (Until that time, benefits for participants with 20 years of service credit who retire prior to age 62 will be reduced, as is presently the case.) Please reference page 5 of the enclosed Notice for further details.

TERMINATED STATUS PARTICIPANTS: Central States' proposed rescue plan applies lower benefit reductions to retirees and active participants, as compared to terminated participants (those who are not retired and not working for a Contributing Employer), except for terminated participants with 20 years or more of contributory service credit.

The reasons for this are threefold: First, because all categories of participants are dependent on the continued support of the Plan by active participants, they (active participants) should in general be treated at least as favorably as any other class of participants. Second, retirees have given up their jobs and may have been out of the workforce for many years and therefore are likely to be dependent on their Central States pension and unable to replace the income lost through benefit reductions. Finally, many terminated participants have not recently worked for a Contributing Employer for an extended period, and therefore, have presumably found gainful employment and are less dependent on their Central States pension. Because terminated participants who have more than 20 years of contributory service credit are likely to be more dependent on their Central States pension, they are treated under the rescue plan in the same way as active and retired participants.

ORPHANS ("Tier 1"): MPRA mandates the terms of benefit reductions for "orphans," participants (and their beneficiaries) whose employers failed to pay their full employer pension withdrawal obligations (as required under pension law or pursuant to a settlement with the Fund).

Specifically, MPRA requires that the pension benefits of such "orphan" participants (identified in the law as "Tier 1") must be reduced to the equivalent of 110 percent of the amount that they would receive from the Pension Benefit Guaranty Corporation (PBGC) if their multiemployer pension fund were to become "insolvent" and run out of money to pay benefits. This amount is based on years of service and can be generally calculated using the following formula (assuming the maximum PBGC guarantee of $35.75 per year of service):

$35.75 per month x Participant years of credited service x 110 percent

So, for example, for a participant with 30 years of credited service, the Tier 1 benefit would be:
$35.75 per month x 30 years of credit service x 110 percent = $1,179.75 per month

UPS TRANSFER GROUP ("Tier 3"): By law (MPRA), benefits for participants whose employers withdrew from a multiemployer pension plan but paid their full withdrawal liability and also guaranteed certain payments from the multiemployer plan are in a different tier ("Tier 3").

Under the terms of its 2007 withdrawal from Central States, UPS paid the Fund its full withdrawal liability. UPS subsequently promised in a labor agreement that a UPS Pension Plan would cover any future reductions in Central States benefits "permitted or required by law" for participants who were active or terminated UPS employees on December 29, 2007 ("UPS Transfer Group"). Because UPS has committed to making up the difference, there should be no net loss of pension benefits for protected UPS Transfer Group participants with Tier 3 benefits or their beneficiaries under our proposed pension rescue plan even though these participants' Central States pension benefits may be reduced.

"TIER 2" PARTICIPANTS: All participants not classified in "Tier 1" or "Tier 3," including participants who retired from UPS before December 29, 2007, will be classified as "Tier 2" and their benefits may be subject to reductions as part of Central States' pension rescue plan, based on each participant's age, years of service, employer contributions, disability status, etc. For all Tier 2 participants, our pension rescue plan has been designed so that post-MPRA benefits are tied to the amount of pension contributions made on each participant's behalf by employers.

AGE: By law (MPRA), the pension benefits of participants age 80 or older as of the rescue plan implementation date are fully protected from reductions.

Pension benefit reductions for participants who are at least 75 but less than 80 as of last day in the month of the rescue plan implementation date will be calculated on a sliding scale, based on age and the amount of the participant's preliminary (non-age adjusted) benefit reduction under the rescue plan, as indicated in the following formula:

Number of months until participant reaches age 80 divided by 60 months multiplied by preliminary rescue plan benefit reduction = Final, age-adjusted benefit reduction.

For example, a participant who is age 77 years and 6 months on the last day of the month of the proposed rescue plan implementation date (July 31, 2016) would have two years and 6 months (30 months) until the age of 80. As a result, their proposed pension benefit reduction would be limited to 50 percent (30 months/60 months) of what the reduction would otherwise be without the age protection.

DISABILITY: By law (MPRA), participants who are receiving a disability benefit from a multiemployer pension fund are protected from reductions under our proposed pension rescue plan.

Under the terms of Central States' proposed rescue plan, pension benefits for participants who previously received a disability benefit from our Fund and subsequently converted to a regular pension upon reaching retirement age will be maintained at or above the level of their disability benefit prior to conversion.

A participant receiving a disability benefit from the Social Security Administration <u>will</u> be subject to benefit reductions under our proposed rescue plan <u>unless</u> the participant also receives a disability benefit from Central States.

SPOUSAL/SURVIVOR BENEFITS: Spousal/survivor benefits may be subject to benefit reductions under Central States' proposed pension rescue plan based on the living participant's age. If the participant is deceased, any benefit reductions will be based on the surviving spouse's age.

Consistent with current practice, neither the participant nor spouse may change a joint survivor election once it has been made.
